

Results of the NTC QSO Party – March 2023

37 logs coming in this time. Many of you decided to stay on 40 meters (band seemed very good) despite 80 meters being good also. Enno PF5X wins the electronic section for the third time in a row! Who is going to beat him? Gerrit PA3AM participates for the first time in the mechanical section and wins. You can find the totals for this year on page 3 and 4.

English Soapbox:

Carl, IK1YRA: thanks for the week test, that's always fun and this days more hams playing on it. This time I operate from the ship where I'm working on the North Sea, my station is always at home (Italy) but I was in my cabin on the sea....More Fun for me. Keep going like this, great!

Luc ON7DQ: After missing the February edition, it was good to be back. Most activity on 40m, working the spotted stations. Last 15 minutes went to 80m and worked a few more. All QSO's were "handmade" with my beloved Woody Cootie.

Gerrit PA3AM: with a long 45 mins run, than changed to 80 for the last 15 mins, thus no 20m experience yet. 100W barefoot, Sky Wire antenna, Vibroplex Lightning Bug 186892 from 1954. Played CQ-only. Was fun to meet all NTC members and some NM also. Hpe cuagn in CW. 73"

Dutch Soapbox:

Enno PF5X: Evenals vorige maand vooral 40m (goede condx) en weinig 80 hoewel daar de signalen prima waren. Goede buitenlandse deelname, waar zijn de Nederlanders ? Allemaal nog aan het na sidderen van die vreselijke verkiezingsuitslag zeker ... ;-)

Theo PA4Y: Eindelijk gewoon een elektronische log. Was een leuke dit keer alleen was ik in het niets aan het roepen op 80m en bleek ineens veel activiteit op 40m... Volgende x beter opletten HI. Geseind is met een oude Junker, blijft veel oefenen. Ik heb mezelf met de paddle leren seinen dus het zit nog niet lekker in de pols! Tot de volgende x weer!
