

Results of the NTC QSO Party – January 2024

Our first QSO party of the new year with 37 participants. Just one QSO on 20 meters and 40 meters quite difficult to use, so most of you focused on 80 meters. Carl PA0CMU is the top scorer in the electronic class and Lothar DL1DXL in the mechanical class, congrats! Quite a good coverage throughout Europe this party reaching from Norway (LB2WD) to Crete (SV9RPE) and from Scotland (GM3ZDH) to Russia (UA6AX). Thanks all for participating.

Bonus stations are here to stay, so every party during the even months will feature a theme. In our next QSO party you can claim one extra point for every Dutch station. Check out the rules at <https://pi4ntc.nl/ntcqp>.

Don't forget our **yearly anniversary party on January 31**. We will be using our club call PI4NTC together with our special event call signs PF6NTC and PG6NTC. See you there!

Electronic Keying

Call	QSO	80m	40m	20m	Score	
F6JOE	18	12	4		34	
GM3ZDH	14	9	5		28

Dutch Soapbox:

English Soapbox:

Anton ON6NL: Very glad to have a log! Due to rotor problems the antennas were down. 40m dipole at 5 meter up and the 80m antenna laying on the snow. Still made 13 QSOs. This is possible with CW! Rig: IC7610 at 20W.
